Contractor HSSE Management in Zenput

TPG Contractor HSSE Management System leverages Zenput software for task and incident management, audits, and corrective actions. This is the only location to conduct the following work requirements:

1. **Permit to Work** (needed for every job performed)
2. **Contractor Monthly Key Performance Indicators** (due no later than seven days after the end of the previous month)

And the only location for other TPG HSSE-related endorsed forms:

1. **Safety Observations**
2. **Incident – Unsafe Act / Life-Saving Rules Violations**
3. **Incident – Near Miss**

Each Contractor Company and their employees will work off the same login email and password in the Zenput Mobile App. Zenput will create your account using a designated First Name, Last Name, Phone Number and Email Address you provided to your contact person at TPG. Once your account is created at TPG, you must download the app, click Finish Setup, and complete the prompt with the contact information you provided TPG. Then you and your employees will log in with the same email and password and access the forms above.
